

C Language Programming: Homework #5

The function of this program is to print bit pattern of a number.

Define (input)

- (a) An integer (N), define the number format (1=int, 2=float, 3=double).
- (b) A number (X), print bit pattern of this number.
- (c) Use stdin to input (scanf).

Define (output)

Print the bit pattern of the number.

Ex:

N=1,X=-1

output: 11111111111111111111111111111111
